

Pro-Craft™

Knocker Tool

Protect Your Valuable Socket Wrench & Extensions

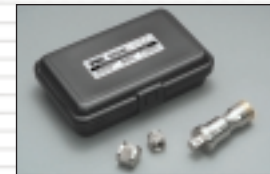

Using your socket extensions to hammer on bolts can reduce the life of your tools and is a potential safety hazard. The Procraft™ Knocker Tool prevents misuse of sockets and extensions by giving you a hard surface to hit with hammer and a hard end piece to use instead of the actual socket. The Knocker Tool is uniquely designed to fit any 3/8" or 1/2" socket/extension and provides many features and benefits.

Brass Impact Cap Absorbs Excessive Shock & Won't Spark

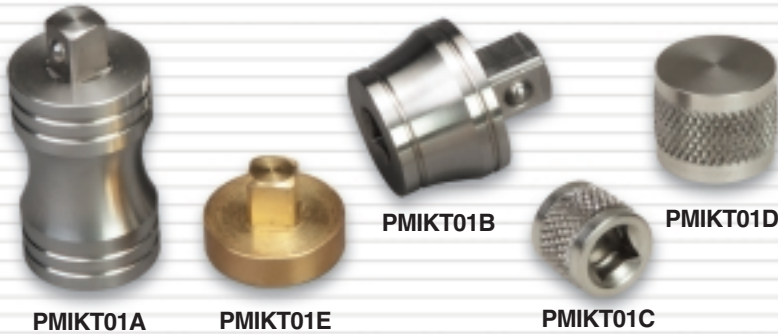

Can Also Be Used As Hand Socket

Use the protection Tool handle as a hand held socket wrench - works great for tight places

Knurled Area For Gripping

- Brass End Cap Provides Shock Absorbing Hitting Surface
- Use with Any Length Extension
- 3-Piece Handel Separates to Expose Different Size Adapters
- Tool Protects Top of Extensions from Damage
- End Attachments Protect Extension Bottom and Sockets
- Won't Spark
- Won't Chip or Cause Damage to Extension or Sockets
- Can Also Be Used As Hand-Held Socket Tool
- Improves Workplace Safety
- 1-Year Warranty
